Specifications subject to change. Incline stability is determined per US Ansi/Resna Dynamic Stability test 8.2. Stability increases by leaning forward or seat not in highest position.

Five-Year Limited Warranty

Five-year prorated limited transaxle warranty. Three-year prorated limited warranty on Main Frame components. One-year prorated limited warranty covering virtually all internal components, including the electronics.

Lifetime Extended Warranty

Lifetime warranty on frame components. Two-year prorated limited parts warranty. Please consult the Owners Manual for eligibility requirements and details of the warranties. Batteries are not part of either warranty.

Battery Charger - Battery charger's are standard equipment with PaceSavers and are a heavy duty, Micro-Light 24 volt constant current fully automatic charger specially manufactured for Leisure-Lift.

Batteries - PaceSavers are designed to utilize size U-1 sealed deep cycle type batteries. These batteries, supplied by your dealer, may be purchased from Leisure-Lift or supplied by a local source. Leisure-Lift only provides warranty coverage on its own batteries. Because they are 24 volts, PaceSavers require two (2) batteries. Please note: all batteries require some form of maintenance. Deep cycle batteries must be kept charged! Batteries left for some time without using and/or charging will go bad.
